

Easy shrink of difficult access areas

Go further with the **EXTENSION WANDS** for **RIPACK® 2200** and **3000**

Quick and easy assembly of one or more extension wands on the RIPACK® 2200 or 3000 heat guns.

All components are integrated and protected from the environment. Use extension wands to work quickly and easily

Extensions facilitate:

- **Works near ground.** Ex: Shrink wrapping of low pallets or applying of thermoplastic road marking.
- **Working zones difficult to reach or from a narrow spot.** Ex: Site of depollution, from scaffolding, in height or downwards.
- **Wintering of boats or protection of large equipment or buildings under shrink film.** Ex: Machines, aircraft, big vehicle, silo, etc ...

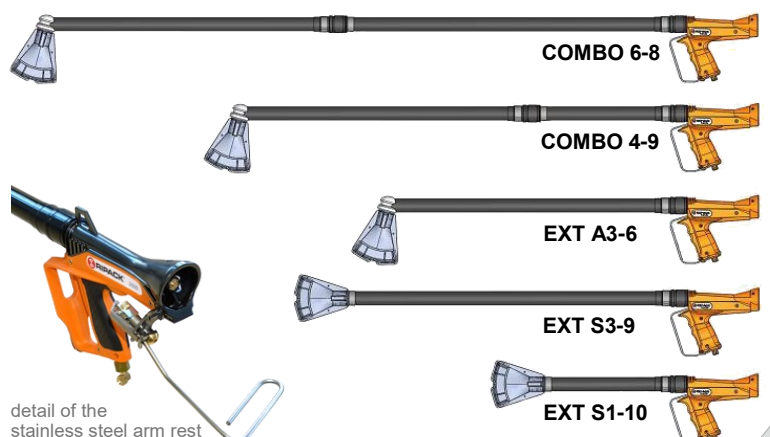

Model	Extension type	Length *	Weight
EXT S1-10	Straight	0,41 m	285 g
EXT S3-9	Straight	0,99 m	530 g
EXT A3-6	Angled	0,87 m	560 g
COMBO 4-9	Combi. angled	1,40 m	845 g
COMBO 6-8	Combi. angled	1,86 m	1090 g

Work comfortably with the pivoting armrest ** that allows to balance the extension wand weight during intensive uses and folds away after use.

(**) only suitable for Ripack® Series 3000
